

BRISTOL HOSPITAL

Domack Restoration is part of the renovations on the Bristol Hospital Emergency Expansion project. Upon completion of the four-phase project in 2021, the Emergency Center will double in size to 26,000 sq. ft. with a better patient flow and a more modern look and feel. Domack together with Bismark Construction will install 15,000 sq/ft. TPO SA system with tapered insulation.
