

BELIMO ROOFING PROJECT DANBURY, CT

Belimo is a company that thrives on design and innovation. As they take the next step in creating a dynamic, sustainable work environment at their headquarters in Danbury, Connecticut, Domack Restoration is honored Turner Construction Company chose our team to be a part of the additions and renovation plan as the roofing partner. Learn more about the project and what makes it unique below.

OUR SCOPE

Belimo's headquarters reflect their company culture and commitment to their customers and protecting the environment. As part of the company's renovation and addition plan, we'll be installing a new Firestone 60 mil TPO Fleeceback roofing system with tapered insulation and cover board.

The roofing system is heat-reflective and extremely energy efficient, which matches the company's values and commitment.

To add to the protection the roofing system provides, it comes with a 20-year manufacturer's warranty.

Belimo's 34-acre headquarters are award-winning for design and sustainability. They accommodate a research lab, office space, a manufacturing area, shipping and receiving, and warehouse space while leaving room for growth and expansion. We look forward to being a part of this project.
